

First Layer of Defense, Why Should I Be Wearing Gloves?

Protect Yourself

Avoid irritation from repeated exposure to moisture and chemicals. Gloves also reduce the risk of irritation of cuts and lesions on your hands.

Protect Others

Help "Prevent the Spread" for diseases and other blood borne pathogens, particularly important in food service, janitorial and first aid applications.

Resistance to Chemicals

Reduce exposure to chemicals. Absorption through the skin, of certain chemicals can have long term physical effects.

Reduce Potential Cross Contamination

Reduce cross contamination by regularly changing gloves.

Get a Grip!

Oily or slippery liquids can make objects hard to hold onto. Gloves provide a secure grip.

GETTING THE PERFECT FIT!

Disposable Glove Sizing Chart

Directions:

Print and then place hand on chart, lining up saddle of thumb and side of forefinger. Press down firmly. Your correct glove size is indicated by the size area that the widest part of your hand falls within.
