Visible elegance meets concealed sophistication

There's magic in what's unseen. And because AVENTOS HKi can be fully encased in the cabinet side panel, the only visible part of the hardware system is the hinge arm, which comes in a sleek onyx black finish. This design complements darker cabinetry or contrasts with lighter tones, opening up new design possibilities with an emphasis on aesthetics, proving that true beauty comes from within.

Elegant presentation

A cabinet is much more than a storage place for useful items. With attractive glass fronts, it is a presentation area for everything special. No matter the room, AVENTOS HKI is always an eye-catcher with which you can effortlessly impress your guests.

Minimalist design

We believe function should come first in kitchen design, but that doesn't mean you can't set an example for exceptional design. Because the hardware is concealed within the cabinet panel, AVENTOS HKi is a perfect choice for those seeking a minimalist style. It seamlessly blends functionality with an unobtrusive look, allowing you to enjoy the best of both worlds without compromise.

All AVENTOS benefits included

- Enhanced ease of use of wall cabinet
- Easy access to storage items
- Variable stop ensuring that door will hold in desired position
- Full freedom of movement
- Perfect alignment of base unit and wall cabinet gaps
- Increased quality and functionality of the furniture

Side panel thickness

AVENTOS HKi is so compact that it will fit into cabinet sides that are just 16 mm (5/8") thick. Even the dimensions grant you plenty of creative freedom. All standard dimensions are covered: for cabinets up to 610 mm (24") high and 1828 mm (72") wide.

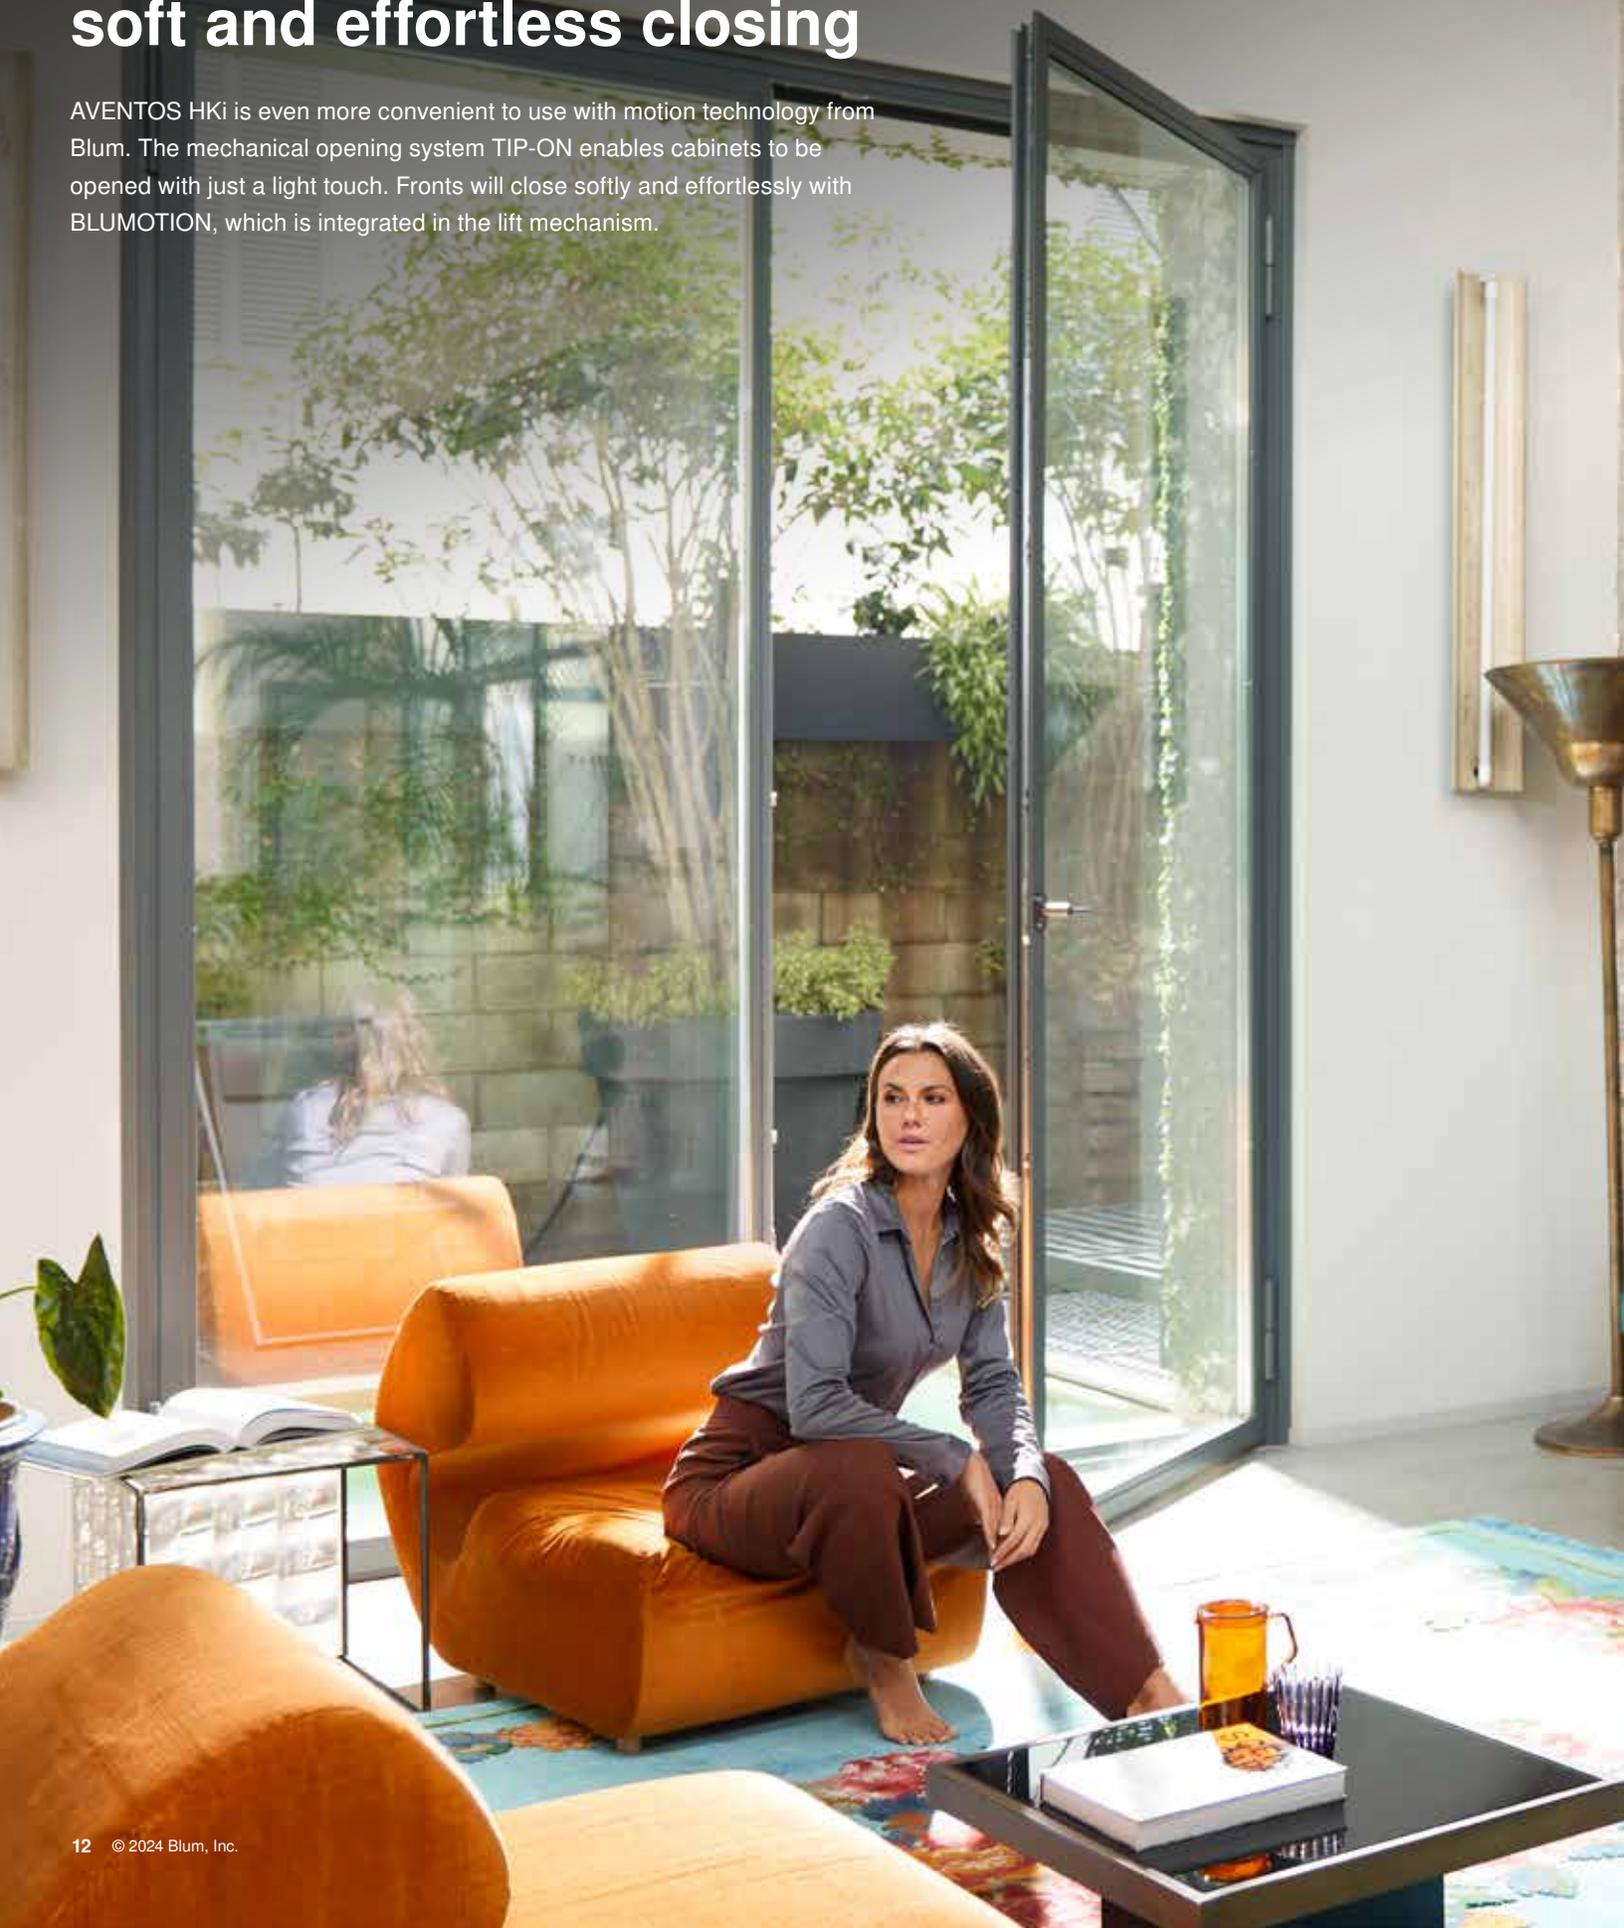

A world full of possibilities

Whether fronts are made from wood, MDF or glass with aluminum frames, AVENTOS HKi offers flexibility in design.

Easy opening, soft and effortless closing

AVENTOS HKi is even more convenient to use with motion technology from Blum. The mechanical opening system TIP-ON enables cabinets to be opened with just a light touch. Fronts will close softly and effortlessly with BLUMOTION, which is integrated in the lift mechanism.

Sophisticated Style

Bringing your vision to life has never been more attainable.

Workflow Options

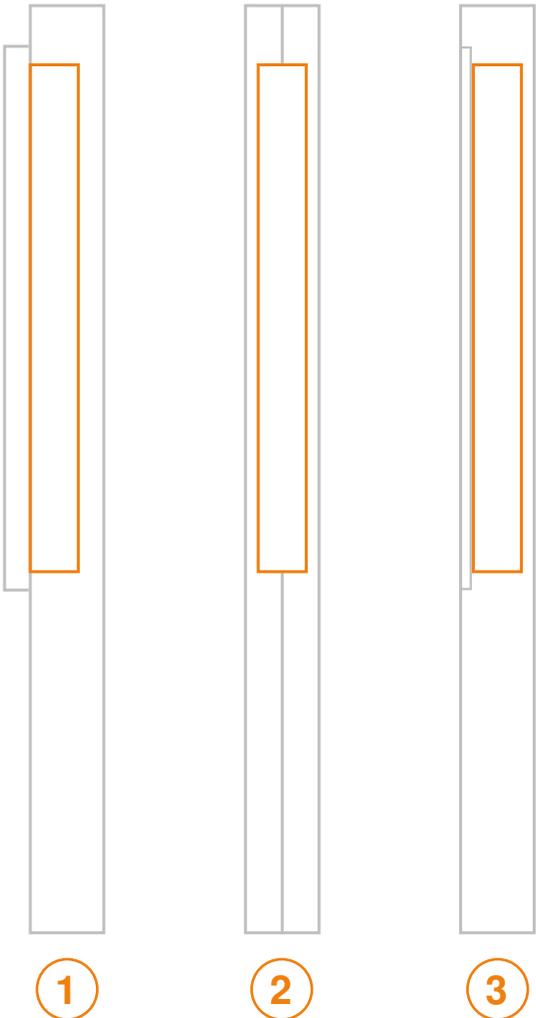

We offer three different implementation methods, designed to cater to your specific process.

Choose the right manufacturing process for you

AVENTOS HKi can be implemented in a variety of ways, depending on your workshop setup. A semi-integrated look can be achieved with a sleek cover cap to finish,^① or fully integrated versions can be implemented by using a two-piece panel^② or multi-stage milling with an insert panel.^③

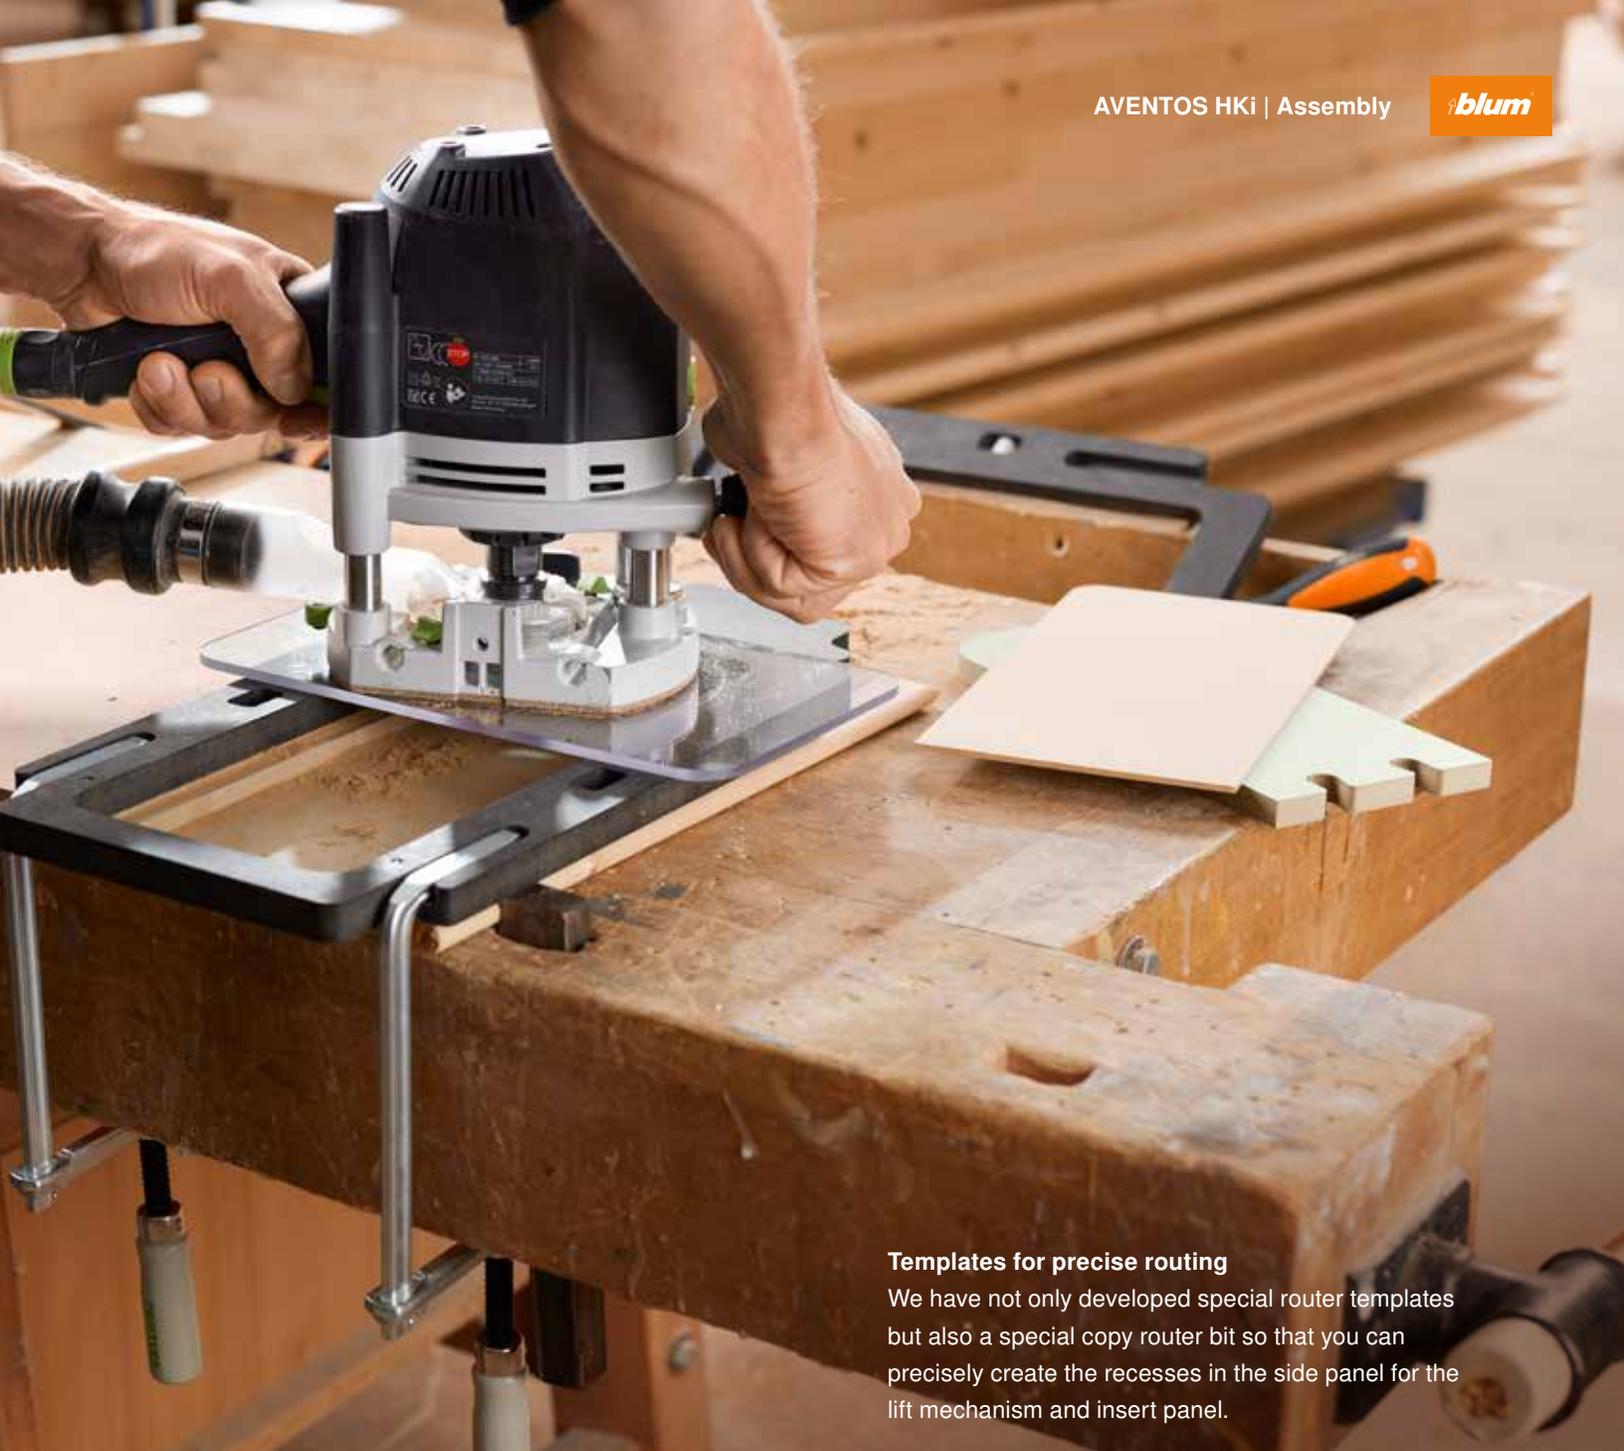

Scan to watch assembly videos.

Customization with cover caps

It is easy to add customized branding with the semi-integrated application of the lift mechanism. Simply rout a recess in the surface of the side panel, insert AVENTOS HKi with a matching-colored cover cap and add the desired branding element, and that's it!

Templates for precise routing

We have not only developed special router templates but also a special copy router bit so that you can precisely create the recesses in the side panel for the lift mechanism and insert panel.

Pre-routed raw boards set

Don't have the tools or the time to rout the boards yourself? We offer MDF raw boards with the recess for AVENTOS HKi ready to go! Simply cut the board (600 mm x 450 mm x 19 mm) down to the size you need and attach facings or finish to suit the look of the rest of the cabinet. A spacer is inserted into the recess, ensuring protection during shipping.

Insert

Step 1: Insert the lift mechanism completely into the recess.

Insert, secure, clip on

Everything has been carefully considered: The installation of AVENTOS HKI is very convenient. Simply insert the lift mechanism into the central recess. The lift mechanism is secured by means of a feed-out system with the turn of a screw. Clip on the door and use the three-dimensional adjustment feature to produce perfect gap alignment.

www.blum.com/hkiassembly

Three-dimensional adjustment

Adjust the door in all three dimensions using Torx screws – for a harmonious gap layout.

Integrated opening angle stop

The integrated opening angle stop allows you to adjust how far the door should open.

Familiar ease of installation

AVENTOS HKi offers all the convenience that you are used to from installing AVENTOS hardware. Despite its compact and narrow design, this product has all the familiar functionalities: adjustment from the front, integrated opening angle stop and three-dimensional adjustment.

Our EASY ASSEMBLY app provides all the information you need for quick and easy installation and adjustment.

www.blum.com/eaapp

Lift mechanism adjustment from the front

Adjust the lift mechanism with a cordless screwdriver to the weight of the cabinet door in a convenient, easy-to-reach location.

Marketing

You will find professional photos, videos, brochures and presentations on AVENTOS HKi in the Marketing Media Library. Get some fresh inspiration and use our marketing material to help guide your customers in sales conversations.

Concept and planning

Plan, configure and save your AVENTOS HKi projects online with ease – with our free Product Configurator. This enables you to obtain checked and complete parts lists for your customer quotes. The Product Database allows you to collect CAD data and technical specs for your desired hardware.

Ordering

Simply download your parts lists from the Product Configurator and send to your distributor. In order to speed up your AVENTOS HKi configurations, you can manage your different projects and templates with ease under "My projects" or "My library."

Supporting you every step of the way

Blum can help support you along the entire process – from marketing, planning and product selection right through to after sales service. Take advantage of our user-friendly services for your projects with AVENTOS HKi.

After sales service

Our knowledgeable customer service and sales force teams are available to provide you with continued support after you purchase AVENTOS HKi. Feel free to reach out to us with any questions you have about our products and services.

Manufacturing

Use our configurators and appropriate assembly devices to accelerate your production process. Use our templates for AVENTOS HKi.

Installation

Need a reminder on how to install or adjust a product?
The EASY ASSEMBLY app for smartphones and tablets answers any questions you may have about assembly and adjustment. It contains installation instructions and videos for all our products.
